Frontend | Backend | Full-Stack

Projects

SOLEY SHOES: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

An e-commerce store for shoes, built using Python, Flask, and MySQL.

- Implemented sneaker database API call to populate the website with the top 100 shoes in each brand. Customized to randomly generate and display sneakers on the store page.
- Created intuitive front-end templates utilizing the Bootstrap framework and the Jinja templating engine in Python.

RHYTHM & CHORDS: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

A website for users to find music lessons, built using the MERN Stack.

- Engineered full CRUD capabilities with MERN technologies, enabling users to Create, Read, Update, and Delete music lessons.
- Implemented a login and registration feature using JSON web token to enhance user security.

BOOK CLUB: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

A book share website built as a Java SpringBoot Application.

- Created full CRUD capabilities with validations using Springboot Java web application technologies, enabling users to Create, Read, Update, and Delete book posts.
- Implemented a login and registration feature to increase user security.

Education

Coding Dojo

Online

Remote

2023

- Full-Stack Developer Certificate

Bachelor of Science

Rowan University

Glassboro, NJ, USA

2022

- Major in Health & Exercise Science
